## The 9/11 Smoking Gun - WTC7

On 9/11/2001, two planes struck two towers, which collapsed shortly thereafter.

The smoking gun is this:

*A few hours after WTC 1 and WTC 2 collapsed, a third tower (WTC7) also collapsed. WTC7 was NOT hit by a plane, and it looked EXACTLY like a controlled demolition.*

Watching the video is sufficient. We don't need any conspiracy theories about how, why, or by whom it was demolished in order for us to know the self-evident fact that it was demolished. The official story denies a controlled demolition; therefore, it is also self-evident that the official story is a lie.

After more than five years of delay, the official story on WTC7 was that burning office material in the few isolated fires we saw was that what caused the collapse. However, it is physically impossible that burning office materials could have caused a complete collapse of WTC7, and it is so ludicrous as to be intentionally misleading, to claim that it could have caused a collapse that looked exactly like a controlled demolition.

Any believable explanation would have to explain why WTC7 collapsed so symmetrically and completely, and at free fall speed (the time it would take for a ball dropped from the top to hit the ground). Any believable explanation would therefore have to explain why WTC7 collapsed as if every structural connection in it were cut at the same instant.

Even if all 9/11 conspiracy theories were wrong, it would still be self-evident that the official story is also wrong; therefore, it is also self-evident that the government, the media, and both political parties cannot be trusted because, at the very least, they don't trust their own ability to think independently.

To be fair, almost no one trusts their own ability to think independently. How better can we honor the victims of 9/11 than to wake up, shed our mystical faith in authority, get off our knees, and embrace our own ability to think?

Lest anyone lose so much progress and relapse back into denial, let's consider a little more evidence right away.

(update 2014) I still encounter educated professionals who don't know that a third tower fell on 9/11, which reminds me of another question: Why did the media bury the existence of the third tower?

I recommend everyone start with the documentary put together for us by Architects and Engineers for Truth. It is packed with evidence and expert testimony. Like me, they also don't speculate on conspiracy theories about how or why. They just add expert testimony to the self-evident fact that WTC7 was a controlled demolition. In it you will see that many [experts agree](#) – *the official story cannot be true.*

We have already examined enough evidence to be certain that the official story cannot be true because it is self-evident that WTC 7 was some form of controlled demolition. Therefore, I am reluctant to distract anyone with additional evidence because how could we possibly make the case any stronger? For example, we don't need to know *anything* about *how* it was demolished to know that it *was* demolished. However, one additional piece of evidence that is pretty amazing is when [Larry Silverstein](#) (the owner) sure sounded like he was admitting a controlled demolition in 2002. The 2002 confession was pretty clear, but the 2004 confession, which never aired, was even more

ABORTION IS LEGAL, AND THUS: SEX CAUSES PREGNANCY, AND A CHOICE CAUSES BIRTH. GIVEN THAT THE WOMAN HAS 100% OF THE RIGHT TO MAKE THE BIRTH/ABORT CHOICE, THEN SHE HAS 100% OF THE RESPONSIBILITY, AND THE MAN OWES CHILD SUPPORT ONLY BY MUTUAL CONSENT. DO YOU

clear – and yet, the media ignored these and other confessions. They don't trust their own ability to think independently.

John Kerry says that he did not know about Larry Silverstein's statement, but that he did know WTC7 was brought down in a controlled demolition because of safety concerns.

Unlike the official story of a collapse by office fire, the confessions by the owners and John Kerry were consistent with the self-evident fact that WTC7 was a controlled demolition. However, the official story is safe; whereas, the confessions cannot be propagated because they could not be true without conspiracy. For example, How is it that WTC7 was already wired for demolition on 9/11? On the other hand, If WTC7 were wired within just a couple of hours, then how was such a miraculous operation kept secret, and *why* has it been kept secret – even after multiple confessions? The entire media conspired to ignore the confessions – just like they conspired to ignore the controlled demolition.

Consider Larry Silverstein's additional admission that he had been at the top of one of the towers having breakfast with his tenants until noon *every day* since July, 26th – every day *except* September 11th.

On a personal note, pretty much no one learned that tower 7 collapsed at first, and when I learned about it in 2006, the first thing I had to admit was that the entire mainstream media were intentionally misleading me *beyond* their usual pro-government politically correct bias. I also had to admit that the leaders of the Democrats and Republicans were working together to intentionally mislead me.

Since 9/11, I had always thought that the collapses of WTC1 and WTC2 were not only highly improbable, but were also very unnatural looking. Nevertheless, my estimate that there was a .5% chance that they could have collapsed like they did was enough that I did not suspect conspiracy, and so I looked into it no further and was unaware of 9/11 truthers until the South Park episode in 2006 making fun of truthers, and this made me curious.

Since 2006, in spite of hundreds of hours of research and a degree in engineering, I have still found no likely explanation to date from official sources; whereas, I have found much evidence that casts suspicion on the official story. In fact, in 2006 there was *still* no official story on WTC7.

It has been my experience that, more than most conspiracies, the official explanations, such as the one in Popular Mechanics, are so full of mistakes, logical fallacies, and pettiness that they have made me *more* suspicious – not less; and attempts by laymen to defend the official story are so full of mistakes, logical fallacies, and pettiness that they *too* have made me more suspicious. Unlike most conspiracies, just about every attempt I have seen by both laymen and the media to discredit critics of the official 9/11 story reveal that those laymen and media don't even *know* the official story, which proves they are just trying to conform!

How better can we honor the victims of 9/11 than to wake up, shed our mystical faith in authority, get off our knees, and embrace our own ability to think?

So what are you suggesting?

I understand from the interview with Silverstein that they (being the Fire Department) had to pull the building in order to prevent more dead firefighters. Sounds logical to me without all the conspiracy stuff.
